

Micronclean India has established a state-of-the-art cleanroom laundry in Bangalore. The plant is a first in India in that it has been specifically designed to process and deliver high quality, sterile ready for use cleanroom garments to support the Indian Pharma/Biotech industry.

The plant has already begun to support Pharmaceutical and Biotech producers who are seeking to export products under increased regulatory scrutiny, such as 2 vaccine manufacturers producing variations of the COVID19 vaccine.

- **Designed from the outset to incorporate world best practices to ensure compliance with the industries highest cGMP.**
- **Brand new facilities in India, built by Micronclean, a family-owned UK company with over 40 years' experience in the provision of contamination control garments.**

UK VACCINE SUPPORT

In addition to the 2 COVID19 vaccines being supported by our facilities in India, our UK plants are supporting a further 4 COVID19 vaccine manufacturers.
