Cleanroom consumables play a very important role in maintaining a controlled environment and ensuring the safety and efficiency of operators and operations.

When it comes to cleanroom consumables the most common questions that come to mind are:

- What is the most important cleanroom consumable?
- What consumable should I be most concerned with?
- Should it be my garment, glove, or wiper selection?
- For which consumables should the selection policy be most stringent?
- Is all the necessary supporting documentation available?

The direct answer is they are all equally important since, your cleanroom consumables work together as a system; interlinked with each other. Almost all cleanroom consumables have the potential to make direct contact with your critical process and/or product. Therefore, if you have one weak link your whole system might breakdown.

To meet these needs the Micronclean range of fully accredited cleanroom consumables has been developed over 35 years to support the requirements of our customers around the world as they develop their cleanroom contamination control strategies.

About us

Biospan Contamination Control Solutions Pvt. Ltd. is a Joint Venture between Span Divergent Ltd. and Micronclean Ltd. A niche organisation fully focussed on the field of Cleanroom Contamination Control.

With our extensive product knowledge and experienced sales and Customer support we are capable of not only providing impartial advice on the selection of appropriate products but also ensuring the material is available on time.

REGIONAL ORDERING AND LABELS

MICRONCLEAN UPDATES ITS PRODUCT LABELS TO COPE WITH DEMAND FROM EXPORT MARKETS

FOLLOWING INCREASING DEMAND FOR OUR MARKET LEADING DISINFECTANT AND CLEANING PRODUCTS, WE HAVE HAD TO ENHANCE OUR EXISTING PRODUCT LABELS TO ENSURE THAT WE REMAIN COMPLIANT.

As a result, we have generated an enhanced label which enables us to remain compliant with labelling regulations and allows us to carry up to three languages in addition to English.

So, the result of these changes is that the product code for our existing CleanGuard 1 IPA 500ml Trigger Spray Sterile will migrate from the current ZSAL64499 to ZSAL64499-A for region A orders, ZSAL64499-B for region B orders and so on. Note this regionalisation only affects products with active chemicals.

The new look labels with the associated regional codes for products will be rolled out progressively during 2021 across our whole consumable range.

Regional Labels in Use

For a UK consumable customer, the default option will always be that they order region A products and they will normally receive region A products.

However, as the English language is present on all the labels and labelling regulations are common across region A-E, we might on occasion substitute the same product with a region B label for instance.

For a Micronclean customer in Spain for instance, the product should always be ordered for region B and to comply with the local language regulations we will supply the product with region B labelling.

Although English is present on all the labels, for regions G and I the products are destined for Australia and India respectively. This is because they have to conform to a different set of labeling regulations in each of these countries and as such these products can only be sold and used in these countries.

Please note If you have any questions please do not hesitate to contact us.

ALCOHOLS

ALCOHOLS CLEANGUARD

CLEANGUARD 1 ALCOHOL TRIGGER SPRAYS

FEATURES

- Translucent ergonomic bottle
- 0.2 micron filtered at point of fill
- Maintains sterility for 12 weeks
- IPA available in sterile and non-sterile forms
- Double bagged

Non Sterile Code	Sterile Code	Description	Size	Pack Qty	Case Qty
	ZSAL64499-A/I	IPA 500ml Trigger Spray Sterile	500ml	Each	24 x 500ml
	ZSAL64950-A/I	IPA 950ml Trigger Spray Sterile	950ml	Each	15 x 950ml
ZNAL64499-A/I		IPA 500ml Trigger Spray Non-sterile	500ml	Each	24 x 500ml
ZNAL64950-A/I		IPA 950ml Trigger Spray Non-sterile	950ml	Each	15 x 950ml

CLEANGUARD 1 IPA 5L RFU

FEATURES

- Bulk container for larger surface areas
- Easy to use with bucket mopping systems
- Tamper evident top
- Double bagged
- 0.2 micron filtered at point of fill
