

# REUSABLE CLEANROOM MOP SERVICE

FROM MICRONCLEAN INDIA

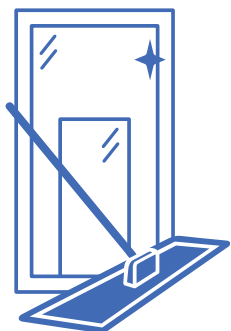

## CLEANROOM MOP SERVICE

Micronclean offer a Laundered Reusable Mop Solution, allowing our ISO Class 4 customers amongst others to be compliant with EU GMP Annex 1, which states:

*"A Contamination Control Strategy (CCS) should be implemented across the facility to define all critical control points and assess the effectiveness of all the controls.*

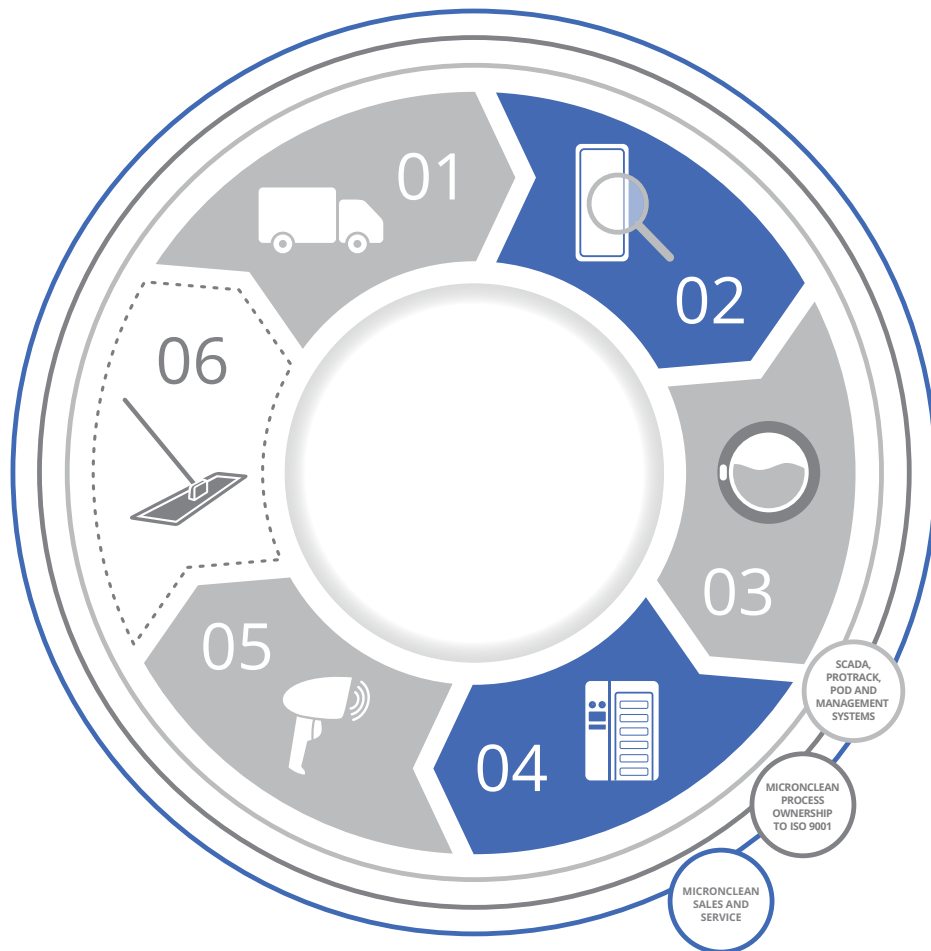

*As part of the CCS the disinfection of cleanrooms is particularly important. They should be cleaned and disinfected thoroughly in accordance with a written programme. For disinfection to be effective, prior cleaning to remove surface contamination should be performed. Cleaning programmes should effectively remove disinfectant residues."*

For this two-stage cleaning and disinfection to be effective the chemicals used to clean and then disinfect surface such as walls and floors should be applied using mops that are clean and sterile. The Micronclean Cleanroom mop service can help with this in that it supplies clean, sterile mops that are ready for immediate use within your facility.

At the heart of the Micronclean Cleanroom Mop service are the reusable microfiber mops which incorporate very low shedding 'endless fibre' technology which is suitable for repeated sterilisation by autoclave. In addition, each mop is individually RFID tagged to give absolute traceability through our unique ProTrack.

## CLEANROOM MOP PROCESSING

01. Collection of Used Cleanroom Mops
02. Full Inspection
03. Cleanroom Mops are decontaminated in an ISO GMP 5/Grade B facility
04. Terminal Sterilisation by autoclave
05. Scanned out and transport to your site
06. Ready for you to use

### CLEANROOM MOP SERVICE

Our Cleanroom Mop service is based on customer feedback and delivers ready to use sterile cleanroom mops either singularly or in packs of five or ten directly to you depending on the size of your facility.

### ENVIRONMENTAL BENEFITS

The use of a reusable mop as opposed to a disposable mop dramatically reduces the amount of waste that your facility generates and must deal with.

*"At Micronclean our passion is to be the first to develop new technological solutions that change the shape of the markets we serve, creating quality and efficiency for our customers."*

Micronclean India has established a state-of-the-art cleanroom laundry in Bangalore. These brand new facilities have been built by Micronclean, a family-owned UK company with over 40 years' experience in the provision of contamination control.

The plant is a first in India in that it has been specifically designed to process and deliver high quality, sterile ready for immediate use cleanroom garments to support the Indian Pharma/Biotech industry.

The plant has already begun to support Pharmaceutical and Biotech producers who are seeking to export products under increased regulatory scrutiny.

Designed from the outset to incorporate world best practices to ensure compliance with the industries highest cGMP garments.
